IEG PI NOTICE

No. 19-74

TITLE/SIGNIFICANCE:

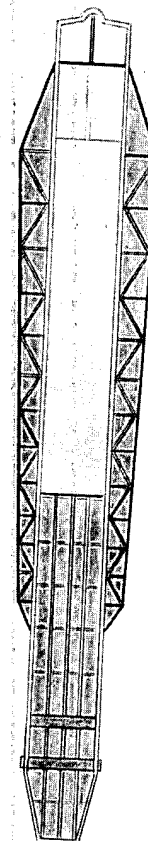

A railcar in an SS-X-16 area at Plesetsk may be a rail-mobile TEL for the SS-X-16.

COMMENT: The railcar shown on the photograph and line drawing is associated in some way with the SS-X-16 missile system. The similarity of the superstructure on this railcar with that on the TEL indicates this could be a rail-mobile TEL for the SS-X-16. This superstructure [redacted] the same as that for the TEL. Rail lines in the western USSR should be the primary location for this railcar, although it could be seen elsewhere.
